DETAILED ACTION

Response to Amendment

The amendment filed 9-14-04 overcomes the examiner's prior art rejection.

Hence claims 1-8, 10-12 and 14-22 are allowed.

Allowable Subject Matter

The following is an examiner's statement of reasons for allowance:

1. An interview was conducted previously between the applicant's attorney and the examiner. The discussions identified areas where the applicant could amend various claims with additional detail (eg. novel material) to overcome the prior art of record. The applicant has amended the claims per the interview and the examiner believes the claims to be novel in his opinion.

2. The independent claims recite novel material and considerable technical detail, such as:

determining status of a user using a first information terminal,

directly transmitting the status of the user from the first information terminal, via an ad hoc local area network operating under an ad hoc communication protocol, to a mobile terminal of the user on a mobile communications network operating under a mobile communication protocol different from the ad hoc communication protocol of the ad hoc local area network;

determining at the user mobile terminal whether the received status of the mobile

terminal user from the first information terminal is one of a plurality of user statuses previously stored in the user mobile terminal',

transmitting the received user status in real-time from the user mobile terminal. via the mobile communications network and other network operating under other communication protocol different from the mobile communication protocol of the mobile terminal, to a predetermined second information terminal, which is discommunicative with the first information terminal and provided on the other network, according to the determining', and

outputting at the second information terminal the user status received from the user mobile terminal via the mobile communications network and the other network.

3. Various other embodiments include a user status generating device, a mobile terminal transmitting device and a computer readable medium.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
